

The MOMENTUM Projects

MOMENTUM is a suite of innovative awards funded by the U.S. Agency for International Development (USAID) to holistically improve voluntary family planning and maternal, newborn, and child health services in partner countries around the world.

Fundamental to MOMENTUM is the recognition that USAID-supported countries have different epidemiologic and demographic profiles and unique, country-specific challenges that require tailored support at national and sub-national levels. The suite of projects works in unison to:

- Scale and sustain access to and use of evidence-based, quality maternal, newborn, and child health services, voluntary family planning, and reproductive health (MNCH/FP/RH) care.
- Improve, institutionalize, measure, and document local capacity to deliver evidence-based, quality MNCH/FP/RH care.
- Increase adaptive learning and use of evidence among partner country technical
